## **WIND CALCULATION TRAINEE**

Etha Wind would like to offer an internship/trainee period for a recently graduated or soon to graduate person with interest and some skills in:

- Sustainable energy
- Basics of Windpower
- Strong mathematical skills
- Some studies in meteorology highly appreciated

Primarily the trainee period is 3 months (October to December 2016). The person in charge of our wind mathematics will during the same period be on partial paternity leave. The right person that can bring new skills to our organization may be offered a job by us after the trainee period.

### **We require from you to be**

- an easy learner
- self driven
- interested in understanding what and why you do things
- having excellent written communication skills in Finnish or English.
- being interested in working in an environment where Swedish is main informal communication language today. Neither spoken nor written Swedish is a requirement.

### **We appreciate:**

- that you know something we do not today, example indepth meteorology or basics of PV business
- additional languages, e.g Russian, German, Spanish
- academic exams

### **Compensation**

We want to offer a competitive compensation to our employees from the moment they actively participate in bring the business forward.
